CCTV Installation Courses in Kochi

Akkimova institution offers best security system courses, covering a wide range of topics including CCTV, Biometric Systems, and Intrusion Alarm Systems. These course provide individuals with essential knowledge and practical skills to protect assets, data, and people from security threats, including physical and digital security. Whether you're an aspiring security professional, an IT expert, or looking to enhance your security expertise, Akkimova institution provides invaluable education to address the diverse challenges in the field of security and protection.

CCTV AND SECURITY SYSTEMS – **Subjects we cover**

I. CCTV System

II. Biometric Attendance and Access Control Systems

III. Burglar Alarm / Intrusion Alarm System

IV. Hands-On Practical Experience

This involves the installation, configuration, and troubleshooting of CCTV system, Biometric and Intrusion Alarm Systems.

V. On Site Experience

The Akkimova Institute provides a one-month site experience offering practical knowledge and hands-on exposure to CCTV, biometric access control, and Intrusion Alarm/Burglar Alarm Systems. During this program, students actively engage in ongoing projects related to the installation, configuration, and maintenance of these security systems at the site. This includes study of CCTV and security course within one month. This experience offers valuable insights into the implementation and operation of these technologies, emphasizing their importance in ensuring security and access control in diverse settings. It serves as a crucial opportunity for students to enhance their skills and knowledge in the field of security systems.
